Please attach this form to your formal proposal. In the proposal, please state specifically any treatment to NCMNS fossil specimens, including embedding procedures, coating required, preservatives applied, etc. Also include any kind of chemical alteration your procedures might cause, and any and all treatments, including glues, coating (e.g. for SEM imaging), that may affect future chemical analyses. It is understood that all samples not completely used in analyses be returned to the NCMNS for curation, with detailed notes on handling procedures, methods applied, and publications resulting from these procedures.
